

# Arizona Tourist Attractions Database

Click on the arrows in the top left to control which record you are viewing. The arrow pointing towards the left with a line goes to the first record, the arrow pointing to the left goes to the previous record, the arrow pointing towards the right goes to the next record, and the arrow pointing towards the right next to a line goes to the last record. In between the previous record button and the next record button is a text box where you can enter the number of a record that you would like to view

Data is displayed on the right side of the screen. The different fields consist of name, county, city, rating, location, picture file location, and description.

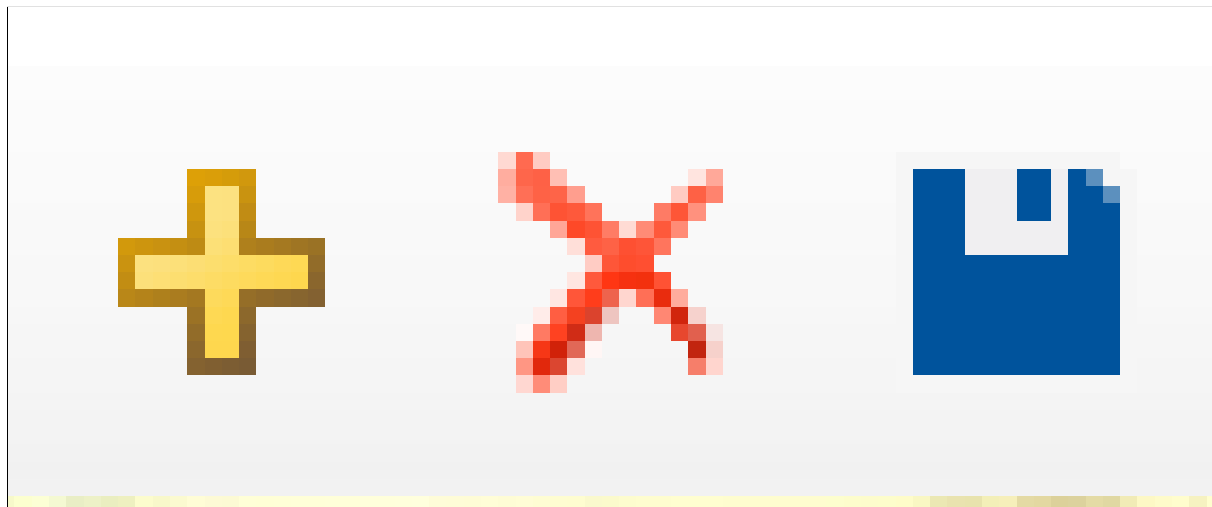

A screenshot of a data entry form overlaid on a map. The form contains the following fields:

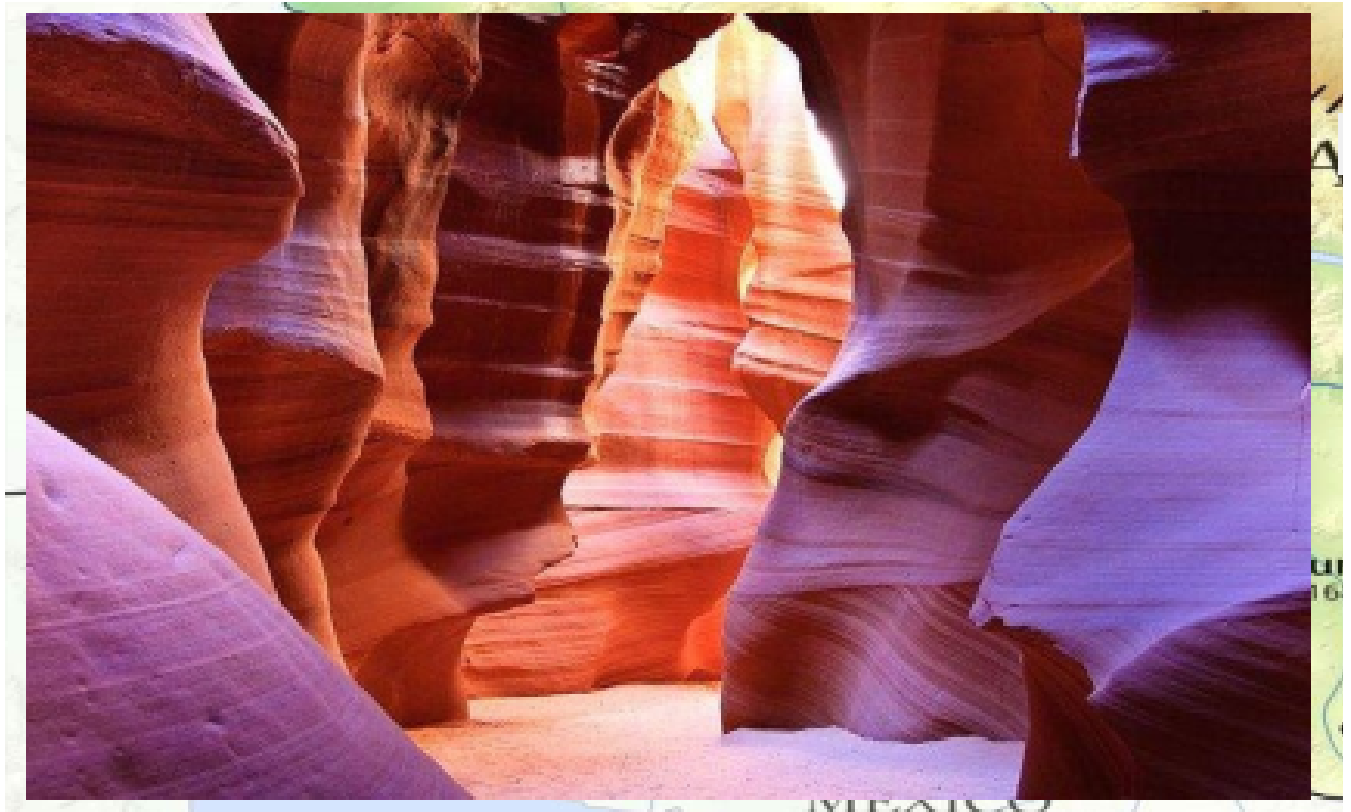

- Name: Antelope Canyon
- County: Coconino
- City: N/A
- Category: Canyon
- Rating: 7.5
- Location: North
- Picture: C:\Users\tbwit078\source\repos\ariz
- Description: Carved from the red sandstone for millennia by seasonal flood rains and wind, the canyons are narrow passageways that lead several hundred feet away from the mouth.

The background map shows a portion of Arizona and Chihuahua, Mexico, with labels for 'P I', 'eys Peak 3852 m.', 'nt Lemmon 38 ft / 2795 m', and 'Chihuahua'.

To edit data, the three buttons on the top of the screen will add a new entry into the database, delete an entry in the database, and save the database respectively.

To set a new picture, click on the picture box and select the picture you wish to show in the record. Then, click on the save button to save the record.

To search the dataplace for a specific name, county, city, rating, and or location type your keyword into the search textbox. Then, click the search button and open the results combo box for results. Select the result you desire and press the show button. The record selected will appear on the screen.

A screenshot of a web interface showing a search form. It includes a 'Search' button, a 'Show' button, a large text input field, and a dropdown menu. A 'Window Snip' watermark is visible in the background.
